Fourth-year B.Sc. Software Engineering student specializing in Data Science, with strong academic background, and hands on experience in end-to-end development and deployment of a production-scale SaaS platform.

I am actively seeking a full-time junior software development position to apply technical expertise, contribute to collaborative projects, and continue developing skills in real-world environments.

Education

2022-2026 – B.Sc. in Software Engineering, Sami Shamoon College of Engineering. **GPA:** 92.

Skills

- **Languages & Frameworks:** TypeScript, Next.js, React, Python, C, C++, C#, Java, SQL
- **Infrastructure & Tools:** FastAPI, Supabase (Postgres, Auth, RLS, Realtime, Edge Functions), Vercel, Docker, Stripe, Mux, Redis, Playwright, GitHub (PRs & CI/CD), MongoDB, Cursor

Work Experience

Software Engineer - Mind Artists Journey (2025-Present)

Directed end-to-end AI powered development of a production-scale B2B SaaS platform for coaches and business owners; owned architectural design, database schemas, REST APIs, frontend UI, AI integrations, and CI/CD pipelines.

Role & Responsibilities

- **Management & Coordination:** Recruited and managed an offshore developer, distributing R&D tasks, conducting code reviews via GitHub PRs, and synchronizing deliverables across time zones.
- **AI Powered Full-Stack Development:** Directed end-to-end feature development, encompassing architectural design, database migrations, REST API implementation, frontend UI, and CI/CD pipeline maintenance.

Key Contributions :

- **Ai Integrations and Development:** Built AI-powered lead engagement and nurturing systems, combining memory-based automation, OpenAI, Anthropic and Gemini integrations for content and transcript workflows, and an embeddings-based RAG pipeline for intelligent search and retrieval.
- **Learning Management System & Milestones Engine:** Architected and built a comprehensive learning management system featuring a hierarchical content tree, automated enrollment, and a rule-based milestone framework with certificate generation. Integrated Supabase Realtime for live tracking, alongside Mux and YouTube for video progress tracking and gamification. Developed an AI-powered personal program coach utilizing OpenAI streaming and RAG over content embeddings.
- **Environment Management:** Managed deployments across production and preview environments using Vercel and Supabase.
- **CI/CD:** Improved engineering reliability through CI/CD pipelines, parallelized Playwright E2E tests, and deployment management with Vercel and Supabase.

Languages : **Hebrew** – Native | **English** – Fluent
